SCIENCE FAIR: Reflection

Score: _________________

Title: _______________________________________________________________________________

I spent a total of ____________________ working on my project.

I would grade my project ______________ out of 100 possible points.

ON A MEIGSMAIL GOOGLE DOC: Please write a reflection to describe our science fair. Reflect on YOUR experience with your science fair project. Did you do everything at your best? What would you do differently if you had the chance to do it over again? What was disappointing or frustrating? What did you learn? How well do you feel you managed this long-term project? Your reflection should also include your overall impression of the entire Meigs fair, and some thing you liked about the your project and/or someone else's project. Full credit will be given if your reflection includes all information above and is written in complete sentences.

1) How is ____________________'s project similar to yours?

2) How is ____________________'s project different than yours?

3) What did ____________________'s project do well?

4) What would you change about ____________________'s project?
5) What recommendations do you have for a sixth grader doing a project next year?

6) What was the most enjoyable part of your science fair project?

7) What was the most difficult part of your project?

8) Science is a process of questioning, observing, trying to make sense of the patterns you see, and asking more questions. For your project, what was the most beneficial part of this process?

9) Pick one project (other than your own) that you found interesting. Describe what you liked about it.

10) Choose one of those ribbon-winning projects and describe why you believe it won.

11) Thinking of your own project, what would you do differently next time compared to other projects you notice that were really good? Address only those factors of which you have control.
